

Your client is interested in MIMAR® for their pet's recovery

The alternative to the Elizabethan collar. Patented post-surgical suit with antimicrobial fabric for dogs and cats, designed by a veterinary surgeon. Distributed exclusively through veterinary clinics.

NO CONE

Patented alternative to the E-collar

The removable neck plate limits head turning without a cone, improving the animal's welfare during recovery.

WOUND PROTECTION

Antimicrobial-treated fabric

Treated with SiL2U®+SiLcare A to reduce microbial proliferation, with a water-repellent exterior.

Benefits in practice

- **Compression layer** that reduces seroma formation.
- Quick to fit in theatre or consultation, **no bandaging**.
- Visual wound monitoring and **fewer check-ups**.
- **Patented**: unique cervical immobilisation system.
- **Reusable** and machine washable.

Indications

- Wounds on the **abdomen, thorax and back**: spays, caesareans, mastectomies.
- **Conservative care of cervical disc herniation**.
- **Protection of oesophagostomy tubes**.
- Allows nursing by opening the fabric (it does not fray).
- Suitable for **dogs and cats** of all sizes.

Two models, six sizes

Long suit

Full chest and abdomen: spays, caesareans, abdominal and thoracic surgery.

Short suit

No rear section: cervical disc herniation, neck and chest wounds, oesophagostomy tubes.
